Dr. Robert Tepley, Neuropsychologist

Neuropsychologist **Robert Tepley, Ph.D.** has been appointed to practice at the **Drs. Charlotte and David Brown Geriatric Evaluation Clinic** at Waveny Care Center and will be conducting geriatric assessments and ongoing management on-site.

Available on an outpatient basis, The Drs. Charlotte & David Brown Geriatric Evaluation Clinic at Waveny Care Center was established in 1998 to address common – but often complex – medical issues in adults, especially memory loss, and welcomes adults from all communities.

Dr. Tepley specializes in neuropsychological evaluation and treatment of cognitive impairment, dementia, medically unexplained symptoms and illnesses, developmental and learning disabilities, traumatic brain injury, and chronic pain syndromes.

Through Waveny's Clinic, Tepley will provide comprehensive neuropsychological assessments individually tailored to review each patient's cognitive, psychological, social, medical, functional and caregiver status. Following a geriatric evaluation, his professional recommendations coupled with the development of an individualized care plan can assist patients and their families in making appropriate short- and long-term healthcare decisions that may help improve personal function and manage geriatric conditions that can interfere with quality of life.

Dr. Tepley is the founder of Neuropsychology Consultants, LCC, a private group practice founded in 2002, and is appointed to the allied health medical staff at Norwalk Hospital in Norwalk, Conn. He received his doctorate in psychology from the University of Texas at Austin, completed his internship in neuropsychology at Edith Norse Rogers Memorial Hospital in Bedford, Massachusetts, and completed postdoctoral residence training

in Clinical Psychology and Neuropsychology at Norwalk Hospital. He also is a trained marriage and family therapist, earning a Master of Arts degree in Human Development and Family Relations from the University of Connecticut, School of Family Studies.

Dr. Tepley has presented to physician groups, hospital staffs, and at regional and national professional conferences on various topics, including neuropsychological evaluation of mild cognitive impairment and dementia, neuropsychological aspects of medically unexplained illnesses, behavioral management of the brain injured patient, personality assessment following brain injury or illness, and the nature of traumatic memories.
